

Tips ON TELEMEDICINE

WHAT IS TELEMEDICINE?

It's using telephones and computers to provide a high- quality and easy health care experience from a distance, 24/7. "90 percent of primary care visits can be done remotely"

(from Yahoo!Finance, April 22, 2020)

WHEN SHOULD I USE TELEMEDICINE?

For an emergency, call 911 or go to a hospital emergency room. If it's not an emergency, you can use your phone or computer to talk to a doctor 24/7 with telemedicine. Staying out of a doctors office can reduce your risk of infection.
